

CAMBRIDGE SECURITY SEALS PURCHASES MANUFACTURING FACILITY IN ROCKLAND COUNTY, NY

Company Focuses on Domestic Manufacturing to Offer Customers with Customizable American-Made Products and to Ensure Green Efficiency in Production Process

POMONA, New York, November 4, 2011 – Cambridge Security Seals (CSS), the quality leader in tamper resistant and loss prevention seals, announced today that it has purchased a site for its new manufacturing facility in Pomona, New York. With the new facility, CSS seeks to strategically employ domestic manufacturing to reduce production and delivery cycles, increase custom order flexibility, improve communication across the organization and realize many other benefits related to product quality and customer service. CSS has also committed to retrofitting the facility to be environmentally sound, with sharply reduced energy needs and minimal waste.

“Our ability to develop automated production lines, combined with rising labor costs in China, India, and other overseas global manufacturing markets and increased freight rates, bringing the manufacturing of our seals back to the United States enables us to offer our customers a substantial, attractive and reliable alternative,” said Elisha Tropper, Cambridge Security Seals CEO. “By maintaining a production facility, R&D center, and executive offices within the same complex, CSS will be more responsive to customers, further develop its already-impressive customer-focused culture across the organization, as well as our guarantee that our products are produced under environmentally and socially responsible conditions.”

CSS provides a wide array of plastic, metal, and electronic seals along with other aligned products that deter theft, secure a chain of custody, and provide evidence of tampering. The company services a diverse customer base spanning a variety of industries, including freight logistics and distribution, trucking, retail, cash handling, airlines, rail transportation, government, pharmaceutical, food and beverage, medical, and agriculture.

About Cambridge Security Seals

Cambridge Security Seals, a privately-held enterprise headquartered in Pomona, New York, offers an extensive line of tamper evident, tamper resistant, and high-security loss prevention seals to customers across a wide range of industries. The company’s 60 year legacy of dedication to quality, customer service and value provides a blueprint for reliability and security.
